

Access to Blackboard Collaborate on Chromebook

1. Click the link for the Blackboard Collaborate meeting within the same section where it was created.
2. If you are the moderator/faculty: Click the Join Session button within the pop-up menu.
If you are a participant/student: Enter your name and click “Join Session” within the opened browser window.
3. A pop-up window within Chrome will ask you whether you want to allow Blackboard to use your Chromebook’s microphone. Click Allow. You have the option to perform an audio test to ensure that your speakers and microphone are working.

4. The next pop-up window will ask you whether you want to allow Blackboard to use your Chromebook’s built-in camera. Click Allow. You will be able to view and test your built-in camera output.

5. You will now have the option to take a quick Tutorial about the highlights of Blackboard Collaborate or proceed directly to your meeting.
